

# WIRELESS PROVIDED BY

Welcome to the Sunbelt Agricultural Exposition 2009! This year, CNS Internet, Digitel Corporation, and Sunbelt Ag Expo are providing free wireless internet access! There are two wireless networks that you will see. There is an “AgExpo-Guest” network and an “AgExpo-Vendor” network. The Vendor network provides a higher level of access compared to the Guest network and we encourage you as exhibitors to utilize this wireless network. We hope the wireless system meets and exceeds your expectations.

To connect to the Vendor network, look for available wireless networks. You should see “**AgExpo-Vendor**” in the list. Connect to this network and when prompted, please input the passphrase or key **m5bagexp0**. You should then be connected to the “AgExpo-Vendor” wireless network.

If your wireless management utility requires more in depth information, use the below:

SSID:	AgExpo-Vendor
Security:	WPA2-Personal with AES encryption (preferred) OR WPA-Personal with TKIP encryption
Passphrase:	m5bagexp0
